

## myRIO Robotics Kit: MOUNT ASSEMBLY INSTRUCTIONS

### You'll Need:

- XTPower Battery x1
- myRio x1
- MakerBoard PCB x1
- myRio Mount x1
- XTPower Battery Mount x2
- USB-USB Cable x1
- XTPower Battery-myRIO Cord
- Ribbon Cable x1
- 150mm Beam x2
- 100mm Beam x2
- 40mm Beam x4
- M3x6mm Square Head Bolts x28
- M3 Nuts x20
- M4 Bolts x6
- Hex Driver x1
- Hex Key x1

## Assembling the Battery Mount:

### You'll Need:

- XTPower Battery
- XTPower Battery Mount x2
- 150mm Beam x2
- 100mm Beam x2
- M3x6mm Square Head Bolts x12
- M3 Nuts x12

### Step 1:

Attach 150mm Beam to one of the XTPower Battery Mounts

**Step 2:**

Attach 100mm Beam to the other side of the XTPower Battery Mount that already has the 150mm Beams attached to it.

**Step 3:**

Place XTPower battery into mount so that the 100mm Beams are on the bottom and the battery power button is exposed.

**Step 4:**

Insert remaining XTPower Battery mount onto battery and secure with remaining nuts and bolts.

## Assembling the myRIO Mount:

### You'll Need:

- myRIO x1
- myRIO Mount x1
- M4 Hex Bolts x6
- M3 Square Head Bolts x8
- 40mm Beam x4

### Step 1:

Screw in **1/4 of the way**, 3 M4 Bolts into myRIO mount holes (shown below)

### Step 2:

Flip the mount over and screw in **1/4 of the way**, 3 M4 Bolts into the remaining myRIO Mount Holes (shown below)

**Step 3:**

You should now be able to mount the myRIO both vertically and horizontally. Adjust screws as needed for ideal fit.

**Step 4:**

Detach the myRIO from the mount.

**Step 5:**

Using M3 square head bolts, screw 40mm Beams to myRIO Mount in the locations shown below.

**Step 6:**

Re-attach the myRIO

## Assembling the MakerBoard Mount

### You'll Need:

- makerBoard x1
- makerBoard Mount x1
- M3x6mm Square Head Bolts x4
- M3 Nuts x4

### Step 1:

Fasten makerBoard to makerBoard mount with the square head bolts and nuts using holes shown below:

## Attaching the myRIO to the XTPower Battery

### You'll Need:

- myRIO with Mount x1
- XTPower Battery with Mount x1
- M3x6mm Square Head Bolts x4
- M3 Nuts x4
- XTPower Battery-myRIO Cord x1

### Step 1:

Detach the myRIO from the mount to make assembly easier.

Flip Battery and mount over so power button is face down.

### Step 2:

Screw myRio Mount into 100mm beams on XTPower Battery Mount using 4 Square Head Bolts and nuts. Make sure that the side of the myRIO mount with two screws in it is above the battery label as shown in the picture.

**Step 3:**

Re-attach the myRIO to the Mount.  
The ports on the myRIO and the ports  
on the XTPower Battery should line  
up as shown in the image below.

**Step 4:**

Using the XTPower Battery-myRIO cord,  
plug the battery into the myRIO.

## Attaching the makerBoard to the myRIO & XTPower Battery

### You'll Need:

- Connected myRIO and XTPower Battery
- Mounted makerBoard
- M3x6mm Square Head Bolts x4
- Hex Key
- USB-USB Cable
- Ribbon Cable

### Step 1:

Using the the square head bolts, screw the maker board mount into the 40mm beams attached to the myRIO mount.

**Make sure that the USB port on the board is on the same side as the USB port on the XTPower battery.**

**Step 2:**

Plug the makerBoard into the XTPower battery using the small USB-USB cable.

**Step 3:**

Plug the makerBoard into the myRIO using the ribbon cable.

## Additional myRIO Robotics Kit Mounts

### LCD Screen Mount:

#### You'll Need:

- LCD Screen x1
- LCD Screen Mount x1
- M3x12mm Square Head Bolts x4
- M3 Nuts x8

#### Step 1:

Insert 4 M3x12mm Square Head Bolts into holes in LCD Screen and fasten with an M3 Nut in the back

#### Step 2:

Place LCD Screen Mount on LCD Screen and fasten with M3 Bolts

## Ball Caster Wheel Mount:

### You'll Need:

- Ball Caster Wheel x1
- Ball Caster Mount x1
- M2x6mm Bolts x2
- M2 Nuts x2

### Step 1:

Insert M2x6mm bolts into ball caster wheel casing and fasten with M2 nuts.

### Step 2:

Insert ball caster wheel.

## Servo Motor Mount:

### You'll Need:

- Parallax Servo Motor x1
- Parallax Servo Motor Mount x1
- M4 Bolts x4
- M4 Nuts x4

### Step 1:

Insert Parallax servo mount onto the back of the servo motor. The side with the cord should line up with the side of the mount that has a small rectangular cutout.

### Step 2:

Fasten mount to motor using M4 Nuts and Bolts

## Grove Sensor Mounts:

### You'll Need:

- Grove Sensor x1
- Grove Sensor Mount x1
- M2x6mm Bolts x2
- M2 Nuts x2

Using M2 Bolts and Nuts, secure Grove Sensor to appropriate mount.
